

RELATIONS WITH INSTITUTIONS OF HIGHER EDUCATION

The Berlin Central School District Board of Education recognizes that close liaison and cooperation with institutions of higher education may be of benefit to the District's staff, its pupils, and its programs and activities. The Superintendent of Schools shall therefore pursue opportunities to establish programs that may be expected to have the following effects:

1. Improve communications between the District and institutions of higher education;
2. Promote cooperative ventures, e.g., applications for grants;
3. Provide opportunities for staff to use facilities available at institutions of higher education to develop advanced knowledge and skills that are related to their assignments in the District
4. Provide pupils with opportunities to do college-level work for advanced credit at institutions of higher learning or at Berlin High School or another site in the District; and
5. Facilitate the use of resource staff from other institutions to augment existing instructional programs.
